

ONE HUNDRED FOURTH LEGISLATURE

FIRST SESSION

**LEGISLATIVE RESOLUTION 22**

Introduced by Gloor, 35.

PURPOSE: Patient-centered medical home is a health care delivery process that is transforming today's medical care to a coordinated, patient-centered method of delivering health care. This care is provided in primary and certain specialty care clinics and is coordinated with other medical, dental, and behavioral health services, public health entities, and other community-based support services. The aim of patient-centered medical home is to improve patient experience and individual health outcomes while improving population health and containing health care costs.

This systemwide transformation necessitates the cooperation and collaboration of health care providers, insurers, and administrators, federal and state governmental entities, along with self-insured businesses as purchasers of health care and health insurance, among others.

It is the purpose of this interim study for the Health and Human Services Committee of the Legislature and the Banking, Commerce and Insurance Committee of the Legislature to monitor this medical care transformation in Nebraska and the progress of the participation agreement to recognize and reform payment structures to support patient-centered medical home and to provide a legislative forum for discussion and collaboration among the many stakeholders of this health care industry and health insurance transformation.

NOW, THEREFORE, BE IT RESOLVED BY THE MEMBERS OF THE ONE HUNDRED FOURTH LEGISLATURE OF NEBRASKA, FIRST SESSION:

1. That the Health and Human Services Committee and Banking, Commerce and Insurance Committee of the Legislature shall be designated to conduct an interim study to carry out the purposes of this resolution.
2. That the committees shall upon the conclusion of the study make a

report of their findings, together with their recommendations, to the  
Legislative Council or Legislature.
