

TASK TWO – EXAMINING ALTERNATIVE POLICIES

You must identify several alternative policies for dealing with the problem you have chosen. These policies may include an existing policy or policies being proposed by individuals or groups in the community. You should also include your own original ideas for policies to address the problem.

For each policy presented you should

1. State the policy or suggested policy
2. Identify the individual or group that is proposing the policy
(this could be your own class or group)
3. Identify the advantages of this proposed policy
4. Identify the disadvantages of this proposed policy
5. Identify other individuals or groups in the community who are likely to support this policy
6. Identify other individuals or groups in the community who are likely to oppose this policy

Use the bottom and back of this page to write your answers for each policy you identify.
